DETAILED ACTION

Claim Objections

Claims 1-9 are objected to because of the following informalities:

"the circuit" in lines 2 and 4 of claim 1 and in line 2 of claim 6, appears to be --the MOSFET logic circuit-- respectively;

In claims 2-9, "The logic circuit" in line 1 appears to be --The MOSFET logic circuit-- respectively;

"the logic circuit" in line 2 of claim 7 appears to be --the MOSFET logic circuit--; and "the second transistor" in line 4 of claim 4 appears to be --the first transistor--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sridhar et al. (US PAT No. 5,528,177).

Regarding claims 1-9, Fig. 2g of Srihar et al. clearly teaches a MOSFET logic circuit comprising of three transistors (221, 222, and 224) which performs an OR operation and all claimed limitations.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ogawa (US PAT No. 6,310,491) discloses sequential logic circuit with active and sleep modes.
